## ***SUMMARY***

This content introduces the concept of building private agentic AI flows using Large Language Models (LLMs) to ensure data privacy. It also serves as a promotional piece for the 'Certified watsonx Data Scientist' certification, offering a discount code for the exam. The subject matter suggests a focus on advanced AI techniques, data privacy, and practical applications within the watsonx ecosystem, encouraging professionals to enhance their skills in these areas.

## ***KEY TOPICS***

Private Agentic AI Flows, LLMs, Data Privacy, watsonx, AI, Data Science, Certification
